CONSIDER THIS

This is the first day of Fall 2024. The Autumnal Equinox took place at 8:44 this morning. You may want to remember where you were and what you were doing at that exact moment. Some meteorologists consider September 1st as the start of the season, based on the start of the annual temperature cycle. This occurrence leads us into a cycle of cooling temperatures because of the angle of the earth's axis relative to the sun, and other factors that allow for the existence of life on this planet.

Most of us will settle for this day, though, when we look forward to the colorful and comfortable change from Summer's heat to Winter's frigid cold. God, in His wisdom, created this remarkable planet so that we could live here until the Savior comes to usher us into His eternal Kingdom. Let us be thankful for this habitation which God has provided, and prepare ourselves for the glorious days which are coming, when His promises will be realized by every true follower of Jesus Christ.
